January 3,1920

Dr.L.R.Abrams,
Professor of Botany,
Stanford University.

My dear Sir:

I should like very much to make another plant exchange with you of about the same size that Mr.Ivan Johnston arranged for last year when I was in the Army. I have gotten out a set of duplicates collected in Southern California during the past two or three years and including plants collected at San Diego, Laguna, Playa del Rey, Mohave Desert, near Salton Sea,Temescal.Lake Elsinore,etc. Mr. Johnston went over these sheets with me, so that I am sure there is no duplication of the material that you received last year. This set numbers 950 sheets; we have in addition a set of about 250 sheets, collected by Baker in Nicaragua, and determined by Standley and Blake.

If you are willing to make this exchange, I should like particularly to get California material, and most of all Southern California material. Our sets are ready to send, and will come as soons as I hear from you.

Yours very truly,
